

Lock Up Installation  
Service for all  
Presses

# Plate Cylinder Lock Ups

Acutech offers a wide range of plate cylinder locks and register systems for all makes and brands of presses. Whether it's for a web change, unit addition, reconfiguration or to improve register, Acutech locks are a proven reliable upgrade to any plate cylinder. Made of all stainless or non-reactive metals they are designed for years of trouble free service and can improve start times and reduce start up waste attributable to older OEM or competitive inefficient locks or poor conversions.

## Replacement Locks for all makes and models

**Acutech locks are designed to fit the first time.**

We take a great amount of effort to measure the presses and create accurate drawings prior to conversion and installation. Our services include complete installation and prepress punch bend conversions for a turnkey solution.

# Design Engineering Manufacturing

Acutech's Engineering Team has standard designs of lock ups and plate cylinder conversions to offer you. Our locks feature all stainless material, heavy duty fasteners and precision ground surfaces. Easy to install, set and adjust for reliable performance.

*Locks shown for KBA Headliner Flexo MAN presses*

*Did you know we offer full turnkey installation and training and can convert your existing punch benders?*

## Installation Set Up Training Parts

Our technicians can help set up and install all of the locks according to your schedule. We help minimize conversion time and materials. Acutech also ships parts same or next day and we offer 24/7 service to keep you up and running.

## Experience and Reliability

Acutech locks are easy to install and many use the same punch bend configuration as OEM so you can minimize conversion costs.
